1.1 SIMULATOR BASED LEARNING

1.1.1 Marine Engine Room Simulator

Make: ARI
Model: Desktop Type
Systems: 10 + 1 (Stations + Instructor)
Installed: 2005
Upgraded: 2016
Total Installation Cost: Rs 10289188

Marine Engineers have to carry out multiple tasks simultaneously. The kind of equipment they operate requires a lot of training to run them efficiently. There are numerous small and big parts that together complete the engine room. Getting a thorough understanding of the working and management of this complex system has been simplified with the engine room simulation system. These are specialized training aids that have made maritime education time-efficient and task-effective.

Simulated training prepares students for real-world, on-vessel training and enables them to deal with complex situations that can't easily be taught on ships.

Marine engine simulator is a kind of device which can simulate the actual equipment and system by using a pre-built mathematical model and carry out combined calculation by computer, finally, show the calculation results on human-computer interaction equipment in an information feedback form of real objects through various media.

The operator can reproduce a running state of the equipment and system in the real engine room to the greatest degree through a way of simulated operation and a data feedback which is generated after that interaction, so as to complete the tasks such as specialized skill training, competence appraisal, assessment for operator.

Virtual reality is an integrated interdisciplinary technology which is based on Computer Graphics, the Human Interface Interaction, Multimedia and Sensing Technology in recent years. It is characterized by embedded, immersion, interaction and multi-sensing.

By using virtual reality technology, a realistic effect of engine room and also achieve simulation for the devices and systems.

A trainee successfully completing this training will make safer and more effective contribution to the operation and control of the ship's machinery.

Our ER simulator provides facilities to meet the international and national training requirements for engineer officers.

Modern vessels incorporate most sophisticated engine plants, which are designed for a minimum of control efforts by a reduced number of crew but of course the understanding of the system has to be increased manifold.

The high demand of efficient operation in all aspects requires well-trained engineer officers. The simulator demonstrates many different functions on control panels and graphic display to the trainees. Here they can interact as well as monitor these functions.

The engine simulator can be used for training at all levels including:

- Basic/familiarization training
- Pipeline tracing in the mimic pipeline panel
- Training on main switchboard for paralleling generator and power management system training;
- Operational training for junior engineers
- Advanced training at the engine management level
- Refresher training for qualified and experienced chief engineers
- Emergency training
- Resource management training

Engine Room Resource Management (ERM) belongs to the areas of Scientific Management, the scientific and effective management can make full use of the human resource and equipment resource in the engine room, clarify the duties and responsibilities of the daily work, use and maintenance all kinds of devices in engine room correctly, ensure normal and safety voyage, reduce and eliminate the potential human error, do well in all the emergencies completely. Our ER Simulator could be used to conduct the ERM course.

Marine Engine Room Simulator

1.1.2 Full Machine Bridge Simulator

Make: Applied Research International Private Limited (ARI)

Model: Full Mission Ship Manoeuvring Simulator

Installation: Feb 2023

Installation Cost: Rs 1.25 Crores

Safe handling of vessels in confined waters and harbours requires extremely high attention by ship's bridge personnel. It is a known fact that more than 60 percent of the information available at any time for bridge personnel is gathered through their visual observation of what goes on outside the bridge. Thus, it is a necessity that the simulation training is highly realistic and adaptable to real life situations. The latest maritime simulation technology provides impressive 3D-graphics to depict true-to-life vessel models and exercise areas, ensuring quality simulation training in realistic environments, which is adaptable to real life ship handling situations.

Compared to conventional training, simulators offer a more structured method of building high levels of competence. During simulation training, one can isolate and freeze each sub-system to understand and acquire knowledge, perform critical operations over and over again to train skills, and test and develop attitudes by training in situations that demand complex decision making. Through use of advanced assessment and student profiling systems, simulator training can help isolate areas requiring improvement, and allow the instructor to target corrective training. In this way, the training will focus on bringing out the best in each student.

On our full mission bridge simulator you are able to quickly adapt to the simulated reality and prepare yourself for the worst while hoping for the best. With real equipment on the bridge, a

powerful visualization system, state of the art simulation software will create a training experience that you will most probably never forget.

Our full mission bridge simulator is as close as you will get without going onboard a real ship.

Cadets are able to do training in a real life like environment; the instrumentation on our full mission bridge simulator is the same that one will find onboard a ship. All our sailing areas are made to a high level of detail. We have all major sailing areas in the world available.

Realistic full mission bridge simulator

The ship models we use in our full mission bridge simulator is top of the line quality and highly realistic in their behaviour due to 6 degrees of freedom motion capabilities. We have a total of 20 ship models available for use in our full mission bridge simulator.

You will experience all environmental effects as you would do for real, but please note that when you open the door and leave the full mission bridge simulator for debriefing or coffee break you will not feel the wind in your face. Nevertheless, during your time in our full mission bridge simulator you are going to notice variable drift due to wind and current, squat, bank and interaction effects, perhaps grounding, various amounts of fog, rain, snow and ice.

Our effective training program addresses the student's training needs with respect to knowledge, skills, and abilities. It exploits all media, from personal computer-based training to limited-task and full-mission simulators and applies the appropriate training tool to the specific level of training. For example, it would not be necessary to use a full-mission simulator for early instruction in rules-of-the-road training. Rather, a systematic approach to training promotes convergence toward full-mission expertise by developing basic modules of skills in several steps. This approach encourages the assembly of ever-larger skills modules until the trainee can exploit training on a full-mission simulator.

The following Core competencies are achieved using Bridge Simulator for training:

- Real equipment know-how
- Regulatory understanding
- Operational experience
- External interfaces
- Visualization
- E-learning
- User interface
- Hydrodynamics
- Training & Exercises
- Assessment & Evaluation

Full Machine Bridge Simulator

Pre Sea training cadets by undergoing Bridge Simulator training will not only learn what to expect when he/she is actually in ship's Bridge, but right from day one he will add professional value to the Navigational Bridge Team.

The full mission Bridge simulator has the ability to capture new knowledge and to transfer it forward to trainees in the maritime industry. VISTAS - School of Maritime Studies faculty find that it is not just the students who undergo training but the instructors as well as they continuously learn new approaches and techniques. Practice makes a person perfect.

2.1 MATLAB

VISTAS is subscribed to the Total Head Count License of MATLAB. Faculty, Research Scholars and Students from the various programmes are benefitted through the online MATLAB facility.

The image displays two screenshots related to MATLAB access. The top screenshot shows the MathWorks Account page for user Jerritta S. The page includes a navigation menu with options like 'My Account', 'Profile', 'Security Settings', 'Quotes', 'Orders', and 'Community Profile'. The 'My Software' section features a table with the following data:

VISTAS is offering Open and general elective courses to students in order to cater the need of the academic interest. Students from different departments are learning personality development from school of Management at VELS.

PARTICIPATORY LEARNING

3.1 MOOT Court

School of Law, VISTAS has conducted four Moot Court competitions so far; three National and one International competition. The ThiruIsariVelan Memorial National Moot Court Competition is a flag ship annual event of School of Law, Vels Institute of Science, Technology and Advanced Studies. Vels University hosted CLEA India rounds of moot court competition in the year 2016. The University conducted the CLEA (Asia – India) Mooting Competition 2016 National Rounds in November 2016. His Lordship Hon’ble Justice Mr. Arjan Kumar Sikri, Hon’ble Judge, Hon’ble Supreme Court of India was the chief guest and delivered the valedictory address. Their Lordships Hon’ble Justice Mr. B. Rajendran, Hon’ble Justice Mr. Rajiv Shakhder and Hon’ble Justice Mr. G. Jayachandran, Judges of the Hon’ble High Court of Madras were present to grace the occasion. The first Thiru IsariVelan Memorial National Moot Court Competition 2019 was inaugurated by His Lordship Hon’ble Mr. Justice M.S. Ramesh, Judge, High Court of Madras and the valedictory address was delivered by Hon’ble Mr. Justice M. Nirmal Kumar, Hon’ble Judge, High Court of Madras. The second Thiru.IsariVelan Memorial National Moot Court Competition 2020 was inaugurated by His Lordship Hon’ble Mr. Justice Karupaiyah, Former Judge, High Court of Madras and the valedictory address was delivered by Hon’ble Mr. Justice G.R. Swaminathan, Hon’ble Judge, and High Court of Madras. The third Thiru.IsariVelan Memorial National Moot Court Competition 2021 was inaugurated by Justice Kurian Joseph (Rtd.), Former Judge, Supreme Court of India and the valedictory was graced by Justice G.K. Ilanthiraiyan, Judge, High Court of Madras.

3.2 Learning from Alumni

Chef Prashanth, Chef de Partie of Taj connemara who is an alumnus of the School of Hotel & Catering Management (2015-2018), did a work shop on Indian Cuisine on 26-02-2021 at the department. Mentioned below are the dishes prepared and presented by him. He also explained the techniques involved in its making.

Mutton Rogan josh, Hyderabadi biryani, Makkiki roti and sarsonkasaag, Tunde ke kabab, Seekh Kebab, Kadhai Paneer, RasMalai.

PROBLEM BASED LEARNING

Problem solving is the act of defining a problem, determining the cause of the problem, identifying, prioritizing, and selecting alternatives for a solution and implementing a solution.

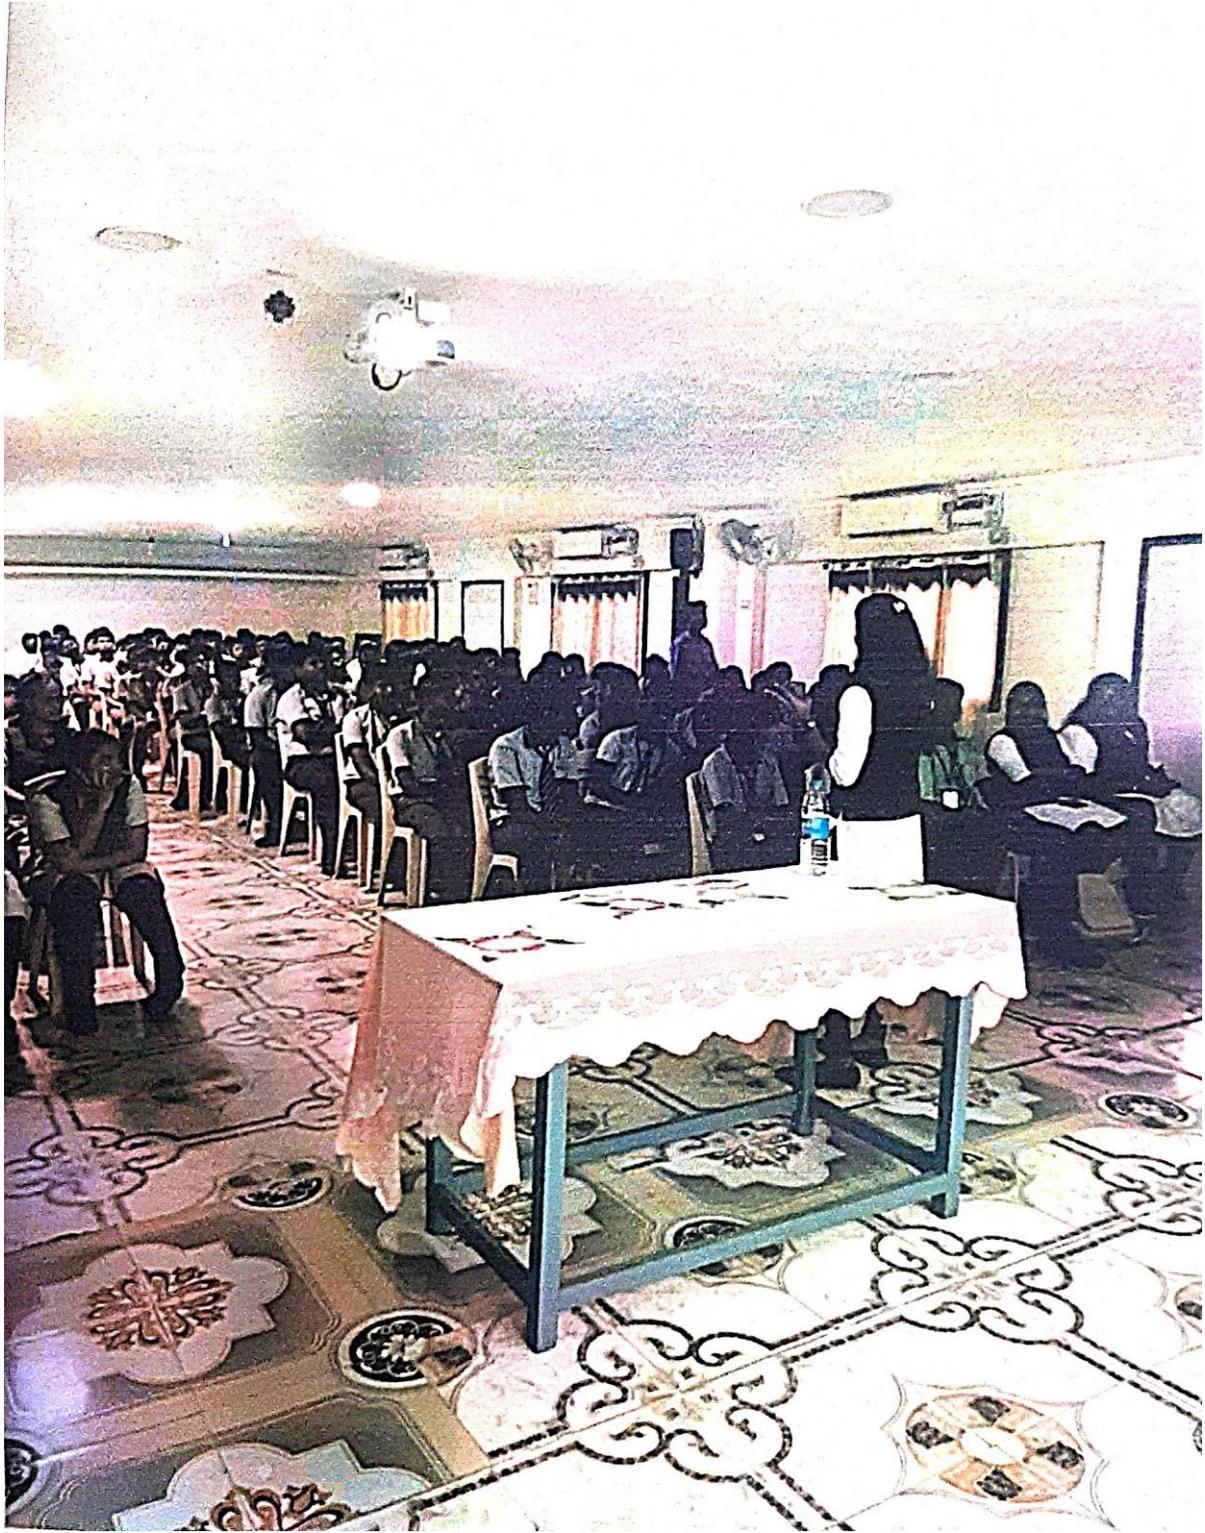

Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. Problem solving models are used to address the many challenges that arise in the workplace. While many people regularly solve problems, there are a range of different approaches that can be used to find a solution. Complex challenges for teams, working groups and boards etc., are usually solved more quickly by using a shared, collaborative, and systematic approach to problem solving.

4.1. Legal Aid and Legal Awareness Programme

Legal Aid programme is an essential part of curriculum at School of Law, VISTAS. The concept of legal aid has been recognized as a fundamental importance by the judiciary. The right to legal aid has been espoused as a basic right in the Constitution. The legal profession is expected to play a dynamic role in the administration of justice. The School of Law, VISTAS tries to inject new spirit into the content of legal education to make lawyers and legal professionals socially relevant and professionally competent to secure the constitutional mandate of access to justice. Based on this concept, organising Legal Aid and legal awareness programme has been made as a mandatory course for law students studying in VISTAS. The students shall have to organise at least one legal aid programme during their entire course of study. By organising such programmes, students tend to raise awareness about various laws among the common citizens, able to understand problems of the people and suggest solutions.

4.1.1 .Awareness on Protection of Children from Sexual Offences (POCSO) Act, 2012

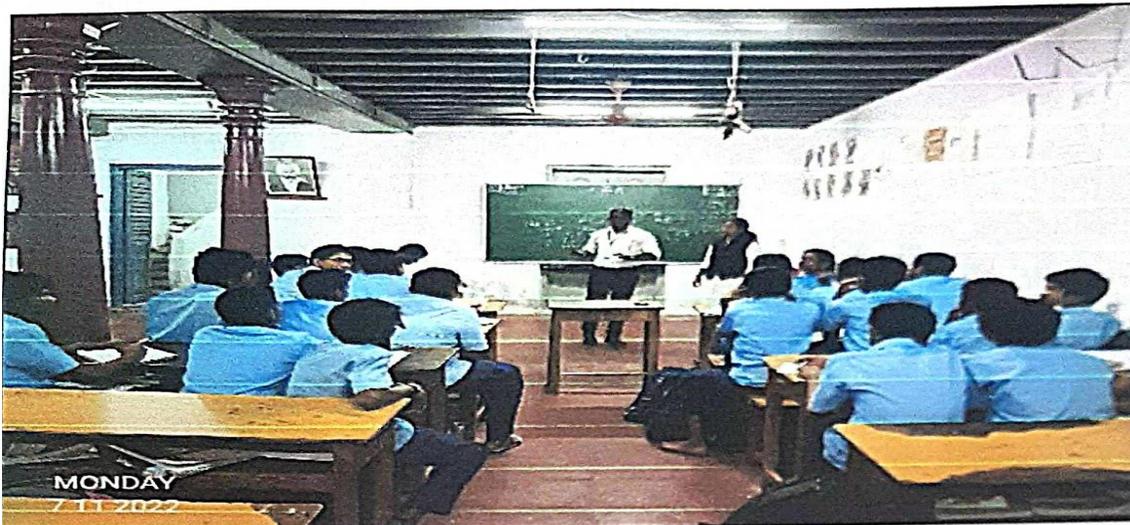

Students of School of Law, VISTAS conducted a legal awareness programme at St. Sebastian Matriculation School, Pallavaram, Chennai on 3.11.2022 on the topic **Protection of Children from Sexual Offences (POCSO) Act, 2012**. In this programme, the students of School of Law, VISTAS enlightened the audience by putting power point presentation on POCSO Act and the remedies available for children under the act. They also disseminated information about how the victims can report the offence to the police. The programme witnessed participation from 186 students.

4.1.2. Legal Awareness Camp on Free Legal Aid System

Students of School of Law, VISTAS conducted a three day legal awareness camp at NKT National Boys High School, Triplicane, Chennai on 7.11.2022 on the topic **Free Legal Aid system**. In the three-day camp, a total of 341 students and 38 teachers participated. The participants were made aware about the meaning of legal aid, the essential conditions for granting free legal aid, method to approach the authority in order to seek free legal aid, who can apply for free legal aid, the mode of legal services and the various legal service schemes that are available to the citizens.

LEGAL AWARENESS CAMP GALLERY

4.1.3. Legal Awareness Programme on Anti-Corruption Mechanisms

Students of School of Law, VISTAS conducted a one day legal awareness programme at Doveton Boys and Girls Higher Secondary School, Vepery, Chennai on 6.11.2022 on the topic **Anti-Corruption Mechanisms in India** as part of National Vigilance Week. In this programme, the students of School of Law highlighted the importance of celebrating National Vigilance Week. They spoke elaborately about corruption and various cases relating to corruption. They also gave emphasis on reports from various agencies and NGOs about the statistical data relating to corruption in India. The students disseminated essential information relating to the method of reporting cases regarding corruption and bribery.

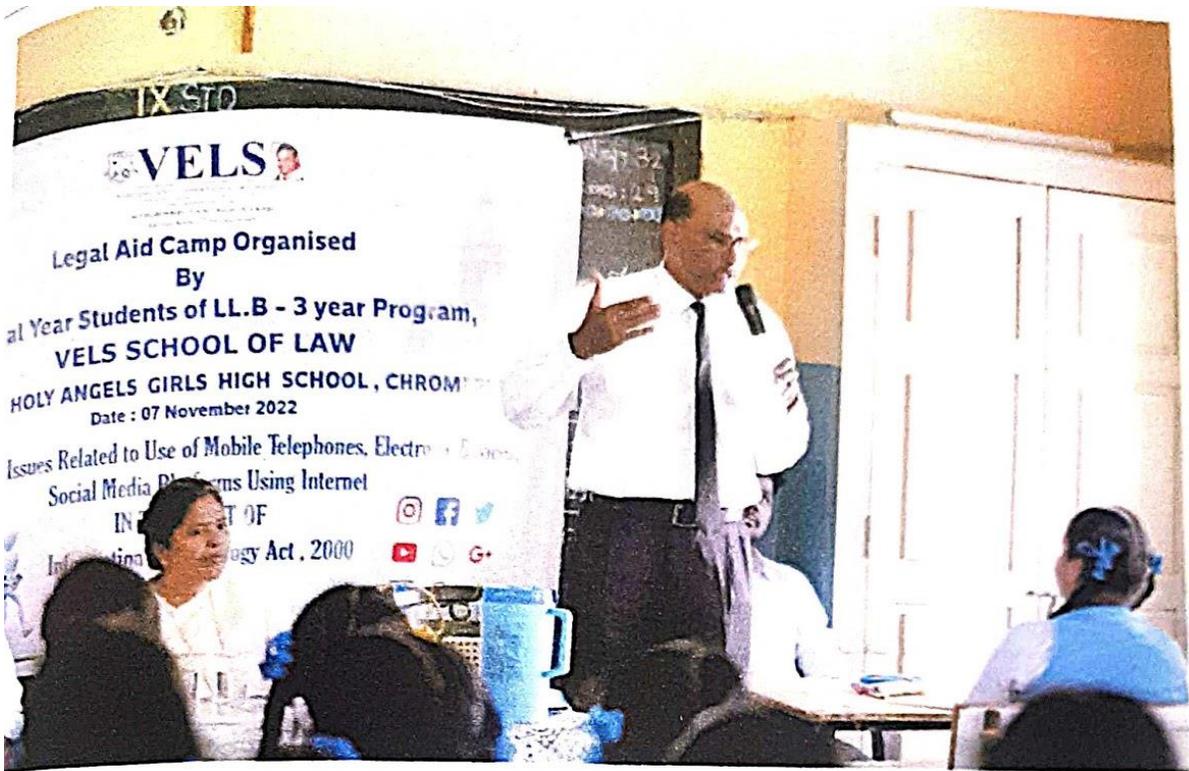

4.5. Legal Awareness programme on Legal Issues related to Use of Mobile Phones, Electronic Devices and Social Media Platforms in the light of Information Technology Act, 2000

The students of School of Law, VISTAS conducted a legal awareness programme on 7.11.2022 in Holy Angels Girls High School, Chromepet, Chennai about the legal issues pertaining to the use of mobile phones and other electronic devices, and social media platforms in the light of Information Technology Act, 2000. The programme witnessed participation of 98 students. In this programme, the participants were enlightened about the various cyber related issues relating to use of mobile phones and other electronic devices, and on social media

platforms. They were made aware about various forms of cyber-crimes, the e-complaint mechanism and also the methods to be cautious about online crimes.

4.2 Case Study (School of Education)

A case study is an intensive, holistic description and analysis of a single unit such as an individual, a group, an institution or a community. A case study is also known as case history of the individual because it is the analysis of the most important aspect of the individual. The analysis is in the form of past record, present position and future possibilities. Case study method enables a researcher to closely examine the data within a specific context. Yin (1984:23) defines the case study research method “as an empirical inquiry that investigates a contemporary phenomenon within its real-life context; when the boundaries between phenomenon and context are not clearly evident; and in which multiple sources of evidence are used. Case studies are considered useful in research as they enable researchers to examine data at the micro level. This method is also known as clinical method which involves a close and deep study of the individual who has a problem.

Objective

To study, to detect & diagnose specific problems, and to suggest remedial measures for individuals or groups of individuals.

Case study record

The case study record prepared is an extensive source of information gained through school records, interviewing the class teachers, parents and peers. To make objective analysis of behaviour, development and learning from the data, a direct observation of a child or individual at home/out of home and school is carried out. This Scientific analysis of the data leads to proper diagnosis of the problem and gives remedial measures. Each individual case study consists of a "whole" study, in which facts are gathered from various sources and conclusions drawn on those facts.

Importance of case study

- i. It is used for diagnosis and treatment of special problems
- ii. The teacher is able to develop a systematic and full understanding of the individual in his total functioning
- iii. It provides an adequate picture of the subject in counselling service so that the counsellor can help the subject for better adjustment.

6. OTHERS / மற்றவை

1. Problem of the student / :
மாணவரின் பிரச்சனை

The subject was hyperactive and not attentive in the classroom.

2. Diagnosis by student teachers / :
பயிற்சி ஆசிரியரின் கண்டறிதல்

While taking class, the subject could not sit in one place and he kept on changing the place stating different reasons.

The subject was also found inattentive during class hours. The subject always watching outside or disturb the others while taking class.

3. Advice and guidance given /
அறிவுரையும் வழி காட்டலும்

Guidance was given to him by talking to the subject personally. Once I came to know about his problems, the subject was advised not to indulge in such more practices.

The subject was advised to concentrate more on his favourite subject and told him that I would help him to achieve his goal.

The subject was motivated by telling my past experiences too.

4. Follows up
பின்தொடர்பணி

I used to check his class activities daily. The subject was found to be subtle nowadays.

I enquired his friends too about his activities in the classroom and I got positive reviews of him.

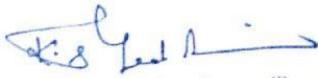

I was told by him that he wanted to study for his mother when I left the school. I saw a change in his behaviour.

CASE HISTORY

My subject name K. Lokesh studying in X standard in Nappinnai Matriculation School. The subject was inattentive and hyper active.

Subject was given proper guidance and advised not to disturb others while taking class and made to sit in front bench and made a eye contact with him always. The subject was also given guidance to achieve his short term goal.

Subject was good in class and listens the teacher words. He remained silent and subtle in the classroom and avoided the quarrel among his friends. The changes were clear in the subject.

SCHOOL OF EDUCATION
CASE STUDY RECORD REPORT -2022-23

Generally, a case study highlights any individual, group, organization, event, belief system, or action. A case study does not necessarily have to be one observation but may include many observations. Case studies are useful for understanding outliers or deviant cases. Teachers develop case studies with particular learning objectives in mind. Additional relevant documentation, such as financial statements, time-lines, short biographies, and multimedia supplements (such as video-recordings of interviews) often accompany the case studies. Similarly, teaching case studies have become increasingly popular in science and arts, management education. The National Center for Case Studies in Teaching Science has made a growing body of teaching case studies available for classroom use, for university as well as secondary school coursework

Every year, in SCHOOL OF EDUCATION, VISTAS we train our student teachers during their internship period to identify the subject, gather data, analyze, define the subject's problem and diagnosis, provide guidance, and write a record. In the academic year 2022-2023, our B.Ed II year 99 students completed internships in several schools and submitted case study reports on their own.

SELF DIRECTED LEARNING

5.1 Blended Learning

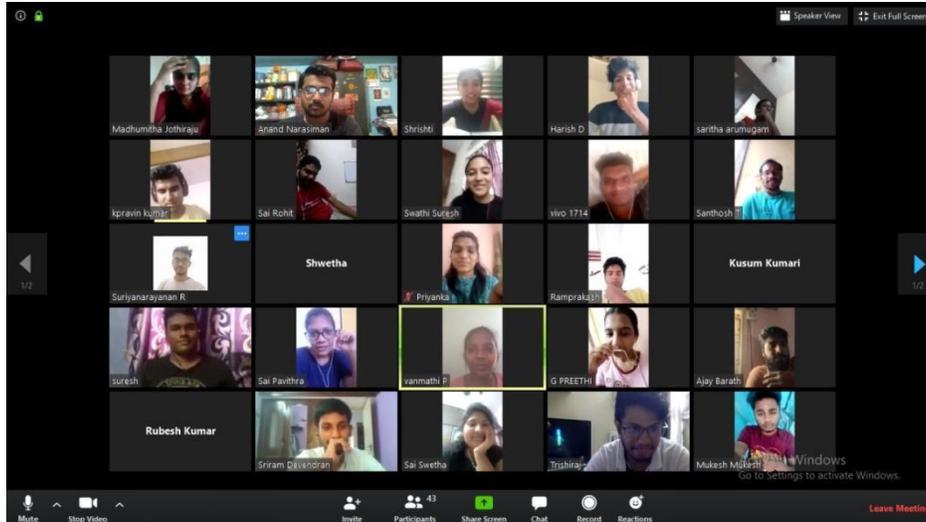

Blending Learning is a style of education in which students learn via electronic and online media as well as traditional face-to-face teaching.

Defining hybrid or blended education is a trickier task than one might think—opinions vary wildly on the matter. In a report on the merits and potential of blended education, the Sloan Consortium defined hybrid courses as those that “integrate online with traditional face-to-face class activities in a planned, pedagogically valuable manner.” Educators probably disagree on what qualifies as ‘pedagogically valuable,’ but the essence is clear: Hybrid education uses online technology to not just supplement, but transform and improve the learning process.

5.2 Flipped Classroom

The Flipped Classroom is a blended learning method in which traditional ideas about classroom activities and homework are reversed, or "flipped." The teaching faculty members post certain course material through study groups on a specific topic to go through the material in advance and bring questions and queries about the topic. This brings additional knowledge on the subject during the class. In the below figure a student from second year clarifies his queries in Biomechanics and Bio fluids Course.

School of Engineering

Query Clarification using Flipped Classroom

Video lectures through digital platforms like SWAYAM, NPTEL, and COURSERA enhance the understanding capability of the students in an efficient manner. Different courses related to the subjects in the program like Medical biomaterials, Semiconductor devices and circuits, Medical Image processing, Python for data science and different self-paced courses are registered by the students in various years. In the below figure, a faculty member shows video lectures from a digital platform to the second year students for the Biomaterials and Artificial Organs course.

5.3 Learning Management System (LMS)

School of Pharmaceutical Sciences

The teachers put the material on a specific topic online on study groups for students to go through the material in advance, bring questions and queries about the topic and build additional knowledge on the subject during the class. This provides the opportunity for learning beyond syllabus also. Few List of you tube video for flipped classes

PATIENT CENTRIC AND EVIDENCE BASED LEARNING

6.1 Medical Practicum in Health Sectors

The school of physiotherapy, VISTAS, provides clinical postings and internship programs for the 3- / 4- year students and interns respectively as the part of their curriculum to enlighten the students with the practical knowledge. Clinical postings for one month during the 3- /4- year students and compulsory 6 months internship program after completion of the final (8-) Sem. This will enhance the soft skills of the students and makes an easy pathway for their future career. Our Curriculum provides 10 credit points for clinical supervision and hands on skill (3- and 4- year students) and 20 credits for Internship training program for interns. It includes both in-house training and training in others specialised hospitals in the following departments.

1. Department of Orthopaedics
2. Department of Neurology and Paediatrics
3. Department of Cardiology
4. ICU training
5. Geriatric and Paediatric rehabilitation
6. Oncology and palliative care
7. Department of Plastic surgery and Burns
8. Department of Orthotics and Prosthetics
9. Fitness Training
10. Department of OBG.

Our clinical training hospitals are as follows.

1. Bone and Joint, Anna Nagar
2. Sundaram Medical Foundation, Anna Nagar
3. Noble Hospital, Purasaiwalkam
4. St Isabel Hospital, Mylapore
5. Indian Red Cross, Egmore
6. IshariVelan Mission Hospital, Thalambur

7. Right Hospital, Kilpauk
8. NIPMED, Kovalam

The school of physiotherapy, VISTAS, always have a keen notice on the practical knowledge of the students. The details of the students and their respective clinical training and internship training program and photos are attached

Basic Life Support Adult Mannequin

A Basic Life Support (BLS) adult mannequin serves as a vital tool in medical training, particularly in teaching essential life-saving techniques such as cardiopulmonary resuscitation (CPR) and airway management. These mannequins are designed to closely mimic the anatomy and physical responses of an adult human, providing a realistic simulation experience for trainees.

MODEL BASED LEARNING

7.1 SHIP MODEL

Ship Model - Instructions

1. The ship models available in School of Maritime studies are utilized for instructional purposes.
2. There are two models available one of which is the model of a Bulk carrier and the other one is of an Oil tanker.
3. It is used during Ship Construction and Naval Architecture classes.
4. During Ship construction classes it is used to explain concepts such as how strakes have been laid from keel to sheer strake.
5. It is also used to explain about the structural components and their individual structural importance present inside the ship.
6. The model is also used to explain concepts of light ship weight and ship appendages.

7.2 COST EFFECTIVE MODEL BASED LEARNING (SOCIALLY USEFUL PRODUCTIVE WORKS(SUPW))

1. Chart

A chart is a combination of pictorial, graphic numerical or verbal material which presents a clear summary. A chart is very helpful and handy to the teacher. The most commonly used types of charts include flip chart, strip chart, stream chart, flow tree chart, river chart, and picture chart. Charts are collections of pictures on large sheets of heavy paper or cloth, use like large maps. Charts are very useful to give oral practice.

1. Flash card

These cards which help teachers give practice to the learner in instantaneous (quick) recognition of words. They are cards 4” in width which are divided in the ratio of 5:6:5 11/4”,11/2”,11/4” for the ascender, body and descender of letters. These are set of cards with the word or phrases written on one side and are meaning given on the other side

1. Picture card

Printed pictures can be cut from magazines or newspapers and mounted on a piece of cardboard not less than “9x9” in dimension. The word and structure that can be taught with the help of the picture have to be written at the back of the card. Pictures enable pupils to see and speak about action and an object which it would be impossible to reproduce in class time is saved.

1. Picture set

Take a sequence of picture that tells a story. Sequence of pictures in the form of film strips can be projected on the wall one on a screen, that case , the order of pictures never get mixed; the picture is large and clear and it can be changed with a flick of the wrists as quickly as students can say something about it. Students can read both columns and the column of pictures cover the text and get the learners to tell the story while looking only at the picture.

1. Rotating disk

The utility model provides a numbered rotating disc teaching aid for children, which belongs to teaching aids for children and is simple in structure and simple and convenient in operation. The numbered rotating disc teaching aid for children comprises a base, and is structurally characterized in that a supporting rod is arranged on the base, a shaft is arranged on

the supporting rod, and a front rotating disc with operational signs and a rear rotating disc with numbered circular sheets at the edge are respectively fixed on the shaft

1. Puppets

Puppetry as a teaching tool provides teachers with one of the most inexpensive aids in the classroom. The benefits from puppets are many. They allow children to escape into an imaginary world. They are able to use puppets to work out their own emotional problems. The puppet acts as a mask behind which the child is able to hide. They can be used across the curriculum in projects and crafts. Children learn to cooperate when working in a small group to produce their own puppet play. There are many opportunities for sequencing, organizing, verbalizing, sorting information and gaining self-confidence.

1. OHP sheets

Opaque projector is an improved projector over the slide or film strip projector. We can project any material on the screen using an opaque projector. Photographs, charts, pages of books, writings are pieces of paper etc., can be effectively used in teaching using an opaque projector. Anyhow, it is a handy visual and to use judiciously in the classrooms to present material as they appear in nature.

1. Models

Models are “Three-dimensional representation of a real thing”. A model may be larger, smaller or the same size as the object it represent. it may be complete in detail or simplify instructional purposes. Assembly itself can be instructional. Classroom construction of plastic model kits appeals to children of all ages and can stimulate enquiry and discovery.

About VISTAS

Vels Institute of Science, Technology & Advanced Studies (VISTAS) is one among the premier Educational Institutions in India founded by Dr.Ishari K Ganesh, a visionary and an Eminent Educationist, in fond memory of his Father Shri. Isari Velan, a former minister in the popular Government of Dr.MGR. Vels group of Institutions was established in the year 1992 and granted Deemed to be University status by the Ministry of HRD, Government of India in 2008 (Under Section 3 of UGC Act 1956) and now running 30 Educational Institutions.

This esteemed Institution offers courses in multiple streams over the last 30 years such as Undergraduate, Postgraduate and Doctoral programmes in Medicine, Engineering, Management and Commerce, Pharmaceutical Sciences, Maritime studies, Science and Humanities. VISTAS has been accredited with "A" grade by NAAC and 12 B Status by UGC in its new regulation scheme and announced as mentor institution.

About AVISHKAR 2.0

Avishkar 2.0 is the Intra University Technical Project Expo where Engineering, Science, Pharmacy students can participate and show their creativity and innovations. It aims to encourage the students to showcase their invention by accolade the best projects categorized in the area of focus. This event will provide the students to develop the skills of leadership and to reach out to the wider audience. It acts as a channel for technological development and career progression for the students. It mainly promotes the students to the next stage of thinking by developing innovative products to the society.

Objectives

- ❖ Encouraging and promoting the innovative thinking of the students.
- ❖ Encourage the students to incorporate their inventions for commercialization.
- ❖ Develop Creative thinking, Team spirit among the students

Topics

- ❖ Sustainability
- ❖ Agriculture
- ❖ Sensors
- ❖ Automation
- ❖ Health Care
- ❖ App Development
- ❖ Artificial Intelligence
- ❖ Robotics
- ❖ Mechatronics
- ❖ Graphics Design
- ❖ E-Waste Design
- ❖ Web Development
- ❖ IoT Solutions
- ❖ Water Conservation
- ❖ Alternative Energy
- ❖ Medical Devices
- ❖ Energy Storage
- ❖ Pharmaceutical Innovations
- ❖ Pharmaceutical Formulations
- ❖ Drug Discovery

Instructions to Participants

Students should present on any of the topics mentioned above with an innovative working prototype or alternatively show simulated outputs/applications/coding.
