2. Biogas Plant:

By harnessing the potential of biogas plants, VISTAS demonstrating leadership in sustainability, promote innovation and research, engage the community, and contribute to a greener and more resilient future. The organic waste generated from hostel kitchen, mess and canteen are sent to Biogas plant and biogases generated are used for cooking purposes.

Bio Gas Plants have been installed in the VISTAS campus for disposal of organic waste from mess and canteen. A daily record of food waste fed into the plant and gas produced /used is separately maintained.

In VISTAS FRP base Biodigester with 5 or 14 KWh Cubic meter was utilized in Hostel Kitchens.
